Melbourne Freight Lines	20	50	
Sidings (other than Sidings that are not connected to the Network whether by being disconnected, spiked out, or otherwise closed) and Terminals	5	5	

Line Section	Average Maximum Operating Speed (AMOS) no lower than (km/h) – as per ESC Arrangement (Appendix 6 of Access Arrangement – dated 29 June 2009)	Average Maximum Operating Speed (includes all TSRs) at 8 <sup>th</sup> May 2012	Comments
Sidings that are not connected to the Network whether by being disconnected, spiked out, or otherwise closed	Booked Out	Booked Out	

**Notes:**

- TSR – Temporary Speed Restriction – implemented due to works or condition of the track.
- Average Maximum Operating Speeds are calculated by taking maximum line speeds applying over segments of the track and averaging over the line section. The maximum line speed (as set out in the Network Service Plan) in each section is reduced by the impact of any applicable TSRs (as applicable for trains travelling towards Melbourne –‘up’ direction). Note that speed limits applying to features such as curves or bridges are not included.
