Corio Quay Road (Bayside Road) bridge upgrades

We are delivering vital safety upgrades to four bridges on Corio Quay Road (Bayside Road), North Geelong, to meet the demands of modern freight vehicles.

This project is delivered by the Australian and Victorian Governments, as part of the Safer Local Roads and Infrastructure Program (formerly the Bridges Renewal Program).

Update – January 2026

Corio Quay Road is open to traffic in both directions, following completion of major works on three of the four bridges.

Works continue on the north-bound bridge over the rail-line, south of Langdon Street. One lane of traffic in each direction is available. Please be aware of changed traffic conditions and traffic management.

This project is expected to be completed in early 2026, following amendments to the construction program.

About the works

The following bridges are being upgraded:

- south-bound over the rail-line, south of Langdon Street
- north-bound over the rail-line, south of Langdon Street
- north of Langdon Street over the rail-line, and
- Cowies Creek bridge.

Upgrade works include:

- strengthening bridge decks and placing a new surface
- upgrading barriers to meet modern strength requirements
- rebuilding the road on both bridge approaches, and
- new asphalt, line marking and signage.

Disruptions

There are changes in traffic conditions along Corio Quay Road while these works are underway. Please allow extra time for your journey as delays are expected.

Works will be undertaken from Monday to Friday between 7am and 6pm, with the possibility of nightworks and weekend works.

Throughout construction, lane closures, detours and a 40km/h speed limit will be in place to keep drivers and workers safe.

Traffic controllers will be on-site while works are underway, and temporary traffic lights will manage traffic at other times when required.

Please note: dates and timeframes of these works are dependent on a range of factors, including favourable weather and site conditions.

Detours
